INTRODUCTION

WHY GUARDIANSALE TOKEN ?

Guardiansale token is the first token that will be launched with guardiansale launchpad protocol.

Guardiansale presale protocol's main aim is to make presales process much easier and safer for everyone to be able to launch their own projects with couple of clicks using our website, and without any human intervention. Which will save you the time and the long coding process.

All process of the launchpad is hard coded and explained in the smart contract. Which means no one can change the code and all process publicly explained.

As guardiansale we believe in transparent work. Therefore we publish our code and explanations in our github, audit, bscscan and etherscan.

Guardiansale token will work with low tax for short term investors and for our long term investors, we will support the guardiansale token pool with buybacks.

Guardiansale token will be launched first on BSC Network. After BSC's pool is active and tokens are locked. Guardiansale token will launch 10 days after on ETH Network.

DON'T FORGET TO CHECK THE ROADMAP AND IF YOU HAVE ANY QUESTIONS. YOU CAN REACH US FROM THE SOCIALS BELOW

PRESALE

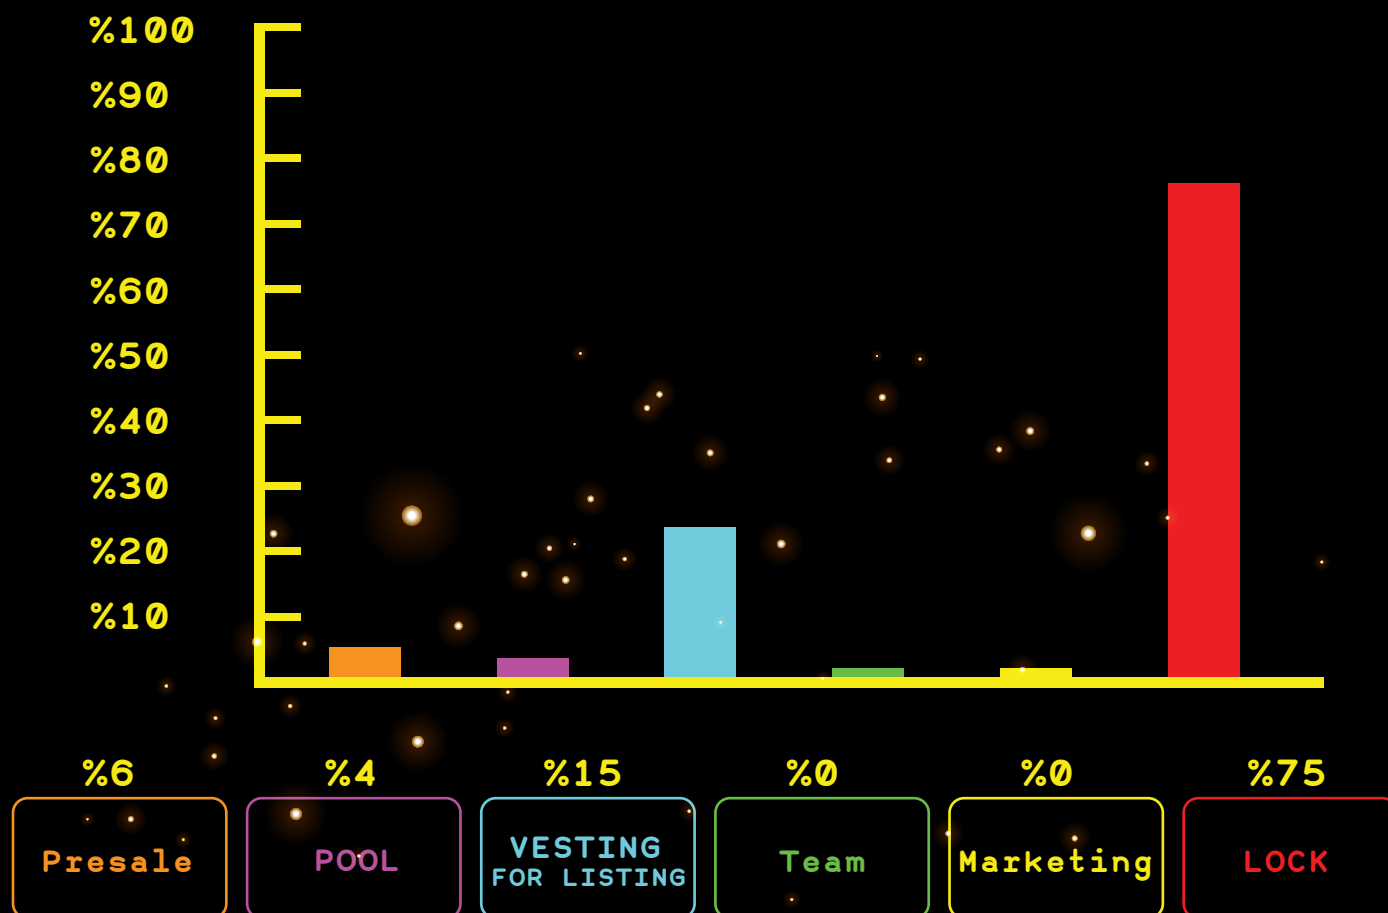

Presale Address	0x74dFb2DE72C9B450C6aA39BD6DB16d33Bcb0Cd80
Token Name	Guardiansale Token
Token Symbol	GST
Token Decimals	9
Token Address	0xb8106748796cDC9257B1315FC772eD2184032c06
Total Supply	100.000.000.000
Tokens For Presale	6.000.000.000
Tokens For Liquidity	4.000.000.000
Presale Rate	1 BNB = 3.000.000 GST
Listing Rate	1 BNB = 2.857.142 GST
Initial Market Cap (estimate)	400.000 \$
Hard Cap	2000 BNB
Presale Start Time	2022.02.24 13:00 (UTC)
Listing On	Pancakeswap
Liquidity Percent	70%
Timelock Contract	0x31eb5d20A82eb54C5bdf4E5F2E92F0f24758A26E
Liquidity Lockup Time	365 days after pool ends
%15 of token vested for listing	2022.9.23 - 13:00 (UTC)
Listing Time	1 day after hardcap reached 18.00 UTC

@guardiansale

TIME LOCKER APP LAUNCH

We are proud to announce that we have launched our time locker contract with our presale for all developers and investors.

TIMELOCK FOR LP AND TOKENS

Our timelock contract is able to lock LP "Liquidity Pool Tokens" or Token itself.

FACTORY

We have created a factory for our time lock contract that generates individual smart contracts.

LOW FEES

Guardiansale timelock has the market's lowest time lock fees.

HIGH SECURITY

Our token and LP locker contract only has one way out and that is creating liquidity pool from inside the contract as well as receiving cake LP tokens. You can check our token lock contract from github, bscscan and etherscan.
